## **Test Summary**

Report No.: DLS-250604014R

## 1. Scope

This European standard is intended to cover electrically power assisted cycles of a type which have a maxiumu continuous rated power of 250W, of which the output is progressively reduced and finally cut off as the vehicle reaches a speed of 25 km/h, or sooner, if the cyclist stops pendaling, and access the design and assembly of electrically power assisted bicycles and sub-assemblies for systems using battery voltag up to 54.6VDC integrated a battery

## 2. Number of tested Sample

Complete test was conducted on Plus7.

2 sets of fully assembled bicycle, 2 pieces of frame, 2 pieces of front fork, 1 piece of handlebar, 1 piece of stem, 1 piece of seat post, 1 piece of saddle, 2 pieces of luggage carrier, 4 pieces of chain, 4 pieces of bell, 4 pieces of brake pad, 3 pieces of motor, 2 pieces of controller, 2 pieces of sensor.

## 3. Conclusion

The application model(s) are in compliance with the requirements of the standards EN 15194:2017+A1:2023 & EN ISO 12100:2010.

If a back-pedal braking system is fitted, the brake shall be actuated by the operator's foot applying force to the pedal in a direction opposite to that of the drive force. The brake mechanism shall function regardless of any drive-gear positions or adjustments. The differential between the drive and brake positions of the crank shall not exceed 60°.  The measurement shall be taken with the crank held against each position with a pedal force of at least 250 N. The force shall be maintained for 1 min in each position.  4.3.5.8.2 Requirement  When tested in accordance with 4.3.5.8.3, there shall be no failure of the brake system or any component thereof.  1500N 1min  The braking system is correctly adjusted No failure or damage found after the test  4.3.5.9.1 General  The progressive characteristics of the brake are determined by linearity measurements. A final, simple track test checks for smooth, safe, stopping characteristics.  Conduct the braking-performance test on a fully-assembled bicycle after the brakes have been subjected to the strength test detailed in 4.3.5.7.4.3.5.8 Before testing the bicycle, inflate the tyres and adjust the brakes all according to the manufacturer's instructions, but in the case of rim-brakes to the maximum clearance specified by the manufacturers.  Requirements  Where EPAC is fitted with secondary brake-levers attached to brake-levers, bar-ends or aerodynamic extensions, separate tests shall be conducted for the operation of the secondary brake-levers in addition to tests with the normal levers. #### Supplementary information:

- 1. Charging current measured at AC 240V, 50Hz input of battery charger.
- Discharging current measured at battery terminal with EPAC in normal ride condition average speed 20km/h. Start current of battery is about 15.0A for 2-3 seconds.

#### 7. Emission Test Results

### 7.1 Conducted Emissions Main Terminal 150kHz to 30MHz

Test Requirement: EN 15194:2017
Test Method: EN 55014-1:2006
Test Date: Nov. 08, 2023
Frequency Range: 150KHz to 30MHz

Class / Severity: N/A

Detector: Peak for pre-scan (9kHz Resolution Bandwidth for 0.15-30MHz)

Quasi-Peak if maximised peak within 6dB of Quasi-Peak limit

Report No.: DLS-250604014R

### 7.1.1 E.U.T. Operation

Operating Environment:

Temperature: 22.0 °C

Humidity: 46 % RH

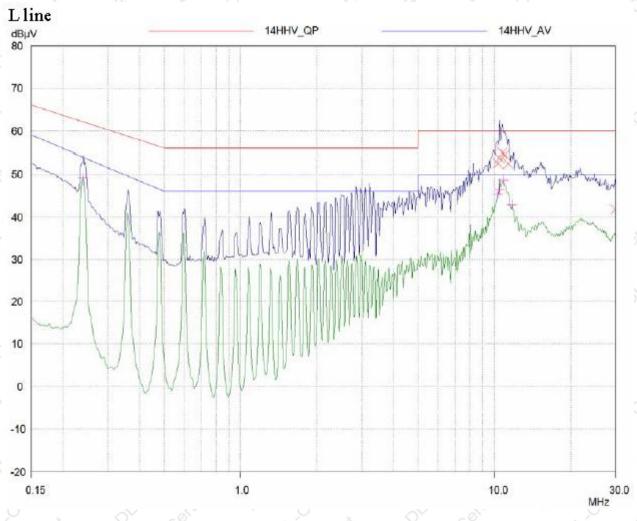

Atmospheric Pressure:1024 mbar

E.U.T. Operation: The EUT was set to achieve maximum emission.

Test Report Tel:400-688-3552 Web:www.dl-cert.com Email:service@dl-cert.com Page 68 of 91

### Report No.: DLS-250604014R

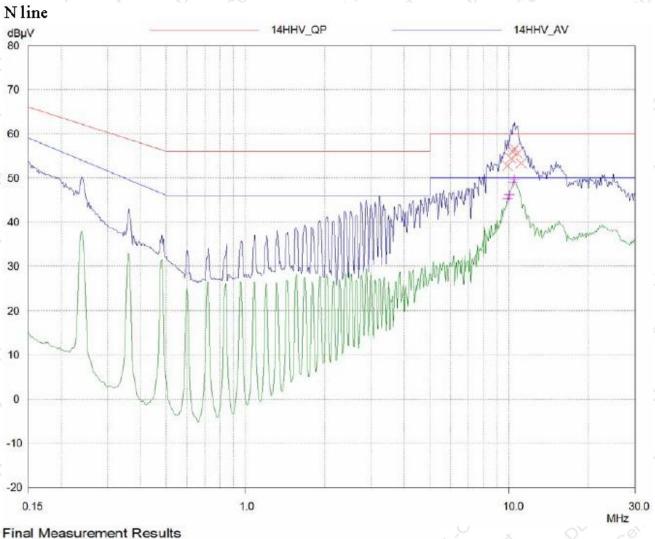

### 7.1.2 Measurement Data

### 7.2 Disturbance Power

Test Requirement: EN 15194:2017
Test Method: EN 55014-1:2006
Test Date: Nov. 08, 2023
Frequency Range: 30 to 300MHz
Detector: Peak for pre-scan

(120kHz resolution bandwidth for requency range 30-1000MHz)

Report No.: DLS-250604014R

Quasi-Peak if maximised peak within 6dB of limit

Result: PASS

# 7.2.1 E.U.T. Operation

Operating Environment:

Temperature: 22.0 °C

Humidity: 46 % RH

Atmospheric Pressure:1004 mbar

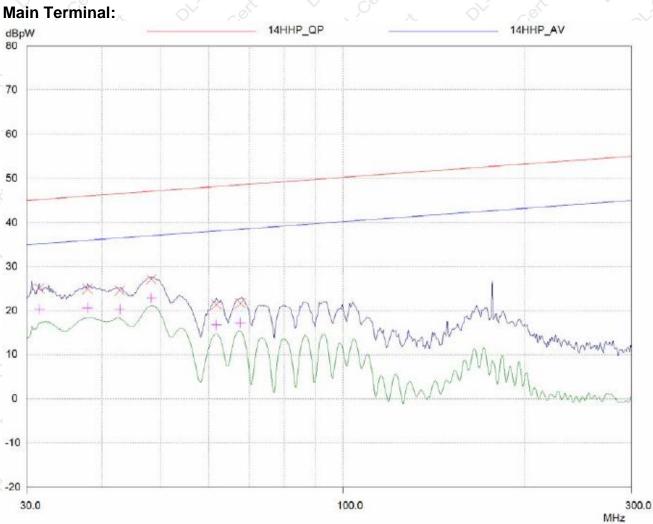

E.U.T. Operation: Test the EUT with full function according to standard.

#### 7.2.2 Measurement Data

An initial pre-scan was performed in peak detection mode. Quasi-Peak was performed at the frequencies with maximized peak emission were detected.

Report No.: DLS-250604014R

### 7.4 Radiated Emissions (30MHz to 1GHz)

Test Requirement: EN 15194:2017

Test Method: CISPR 12:2007 Test Date: Nov. 11, 2023

Frequency Range: 30MHz to 1GHz

Measurement Distance: 3m(EPAC) & 1m(EAS)

Limit: According to EN 15194:2017

Detector: Peak for pre-scan (120kHz resolution bandwidth)

Quasi-Peak if maximised peak within 6dB of limit

### 7.4.1 E.U.T. Operation

#### Operating Environment:

Temperature: 22.0 °C

Humidity: 50 % RH

Atmospheric Pressure:1004 mbar

E.U.T. Operation: The EUT is in representative work mode.

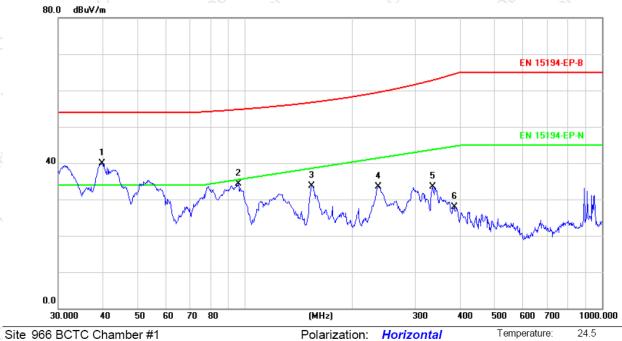

#### 7.4.2 Measurement Data

An initial pre-scan was performed in peak detection mode. Quasi-Peak was performed at the frequencies with maximized peak emission were detected.

## 8 Immunity Test Results

#### 8.1 **ESD**

Test Requirement: EN 15194:2017
Test Method: IEC 61000-4-2 :2001

Test Date: Nov. 12, 2023 Discharge Impedance:  $330 \Omega / 150 pF$ 

Discharge Voltage: Air Discharge: 8 kV

Contact Discharge: 4 kV

HCP: 8 kV VCP: 4 kV

Polarity: Positive & Negative

Number of Discharge: Minimum 10 times at each test point for Contact and VCP

Discharge; Minimum 10 times at each test point for Air Discharge

Report No.: DLS-250604014R

Discharge Mode: Single Discharge
Discharge Period: 1 second minimum

Criteria: Refer to ISO 10605:2008

## 8.1.1 E.U.T. Operation

### Operating Environment:

Temperature: 22.0 °C

Humidity: 46 % RH

Atmospheric Pressure: 1007 mbar

E.U.T. Operation: The EUT is in representative work mode.

## 8.1.2 Direct Application Test Results

Observations: Test Point:

1. All insulated enclosure & seams around EUT.

2. All touchable metal material of EUT

Direct Application					/	Col	Test Results			
Dischard		Polari	ity (+/-)	Tes	st Poi	nts e	Conta Discha		Air Discha	arge
. 8	DV C	٠ .	+/-		1	0,	N/A	· ` `	A	
- X 4	O	Con t	+/-	ý	2	$\Diamond$	⊘ A		N/A	Š.

Test Report Tel:400-688-3552 Web:www.dl-cert.com Email:<u>service@dl-cert.com</u> Page 80 of 91

Shenzhen DL Testing Technology Co., Ltd. Report No.: DLS-250604014R

### **Indirect Application Test Results**

Observations: Test Point:

1. All sides.

Cox	Direct Application	Test Results			
Discharge Level (kV)	Polarity (+/-)	Test Points	Horizontal Coupling	Vertical Coupling	
4 5	+/-		A 0	A A	

### Results:

A: No degradation in the performance of the EUT was observed.

N/A: Not applicable (not required in the standard or floor moutned the EUT)

Test Report Tel:400-688-3552 Web:www.dl-cert.com Email:service@dl-cert.com Page 81 of 91

Report No.: DLS-250604014R

# 8.2 Electrical Fast Transients (EFT)

Test Requirement: EN 15194:2017 Test Method: IEC 61000-4-4:2004 Test Date: Nov. 12, 2023

T Polarity: Positive & Negative Test Level: 1.0kV on AC

Repetition Frequency: 5kHz 300ms **Burst Duration:** 

2 minute per level & polarity Test Duration:

Result: PASS

### 8.2.1 E.U.T. Operation

**Operating Environment:** 

22.0 °C Temperature:

Humidity: 46 % RH

Atmospheric Pressure: 1007 mbar

E.U.T. Operation: Test the EUT with full function according to standard.

### 8.2.2 Test Results On AC Supply:

Lead under Test	Level ( kV)	Coupling Direct/Clamp	EUT operating mode working	Observations (Performance Criterion)
L,N,PE	<b>1.0</b>	Direct	On Working mode	(A)

A:No loss of function was observed.

Test Report Tel:400-688-3552 Web:www.dl-cert.com Email: service@dl-cert.com Page 82 of 91

# 8.3 Surges

Test Requirement: EN 15194:2017
Test Method: IEC 61000-4-5 :2005
Test Date: Nov. 12, 2023

Test

Level: 1kV

Report No.: DLS-250604014R

Line to Neutral, 2kV Line to PE

Polarity: Positive & Negative

Generator source impedance:  $2\Omega$  Line to Neutral,  $12\Omega$  Line to PE

Trigger Mode: Internal

No. of surges: 5 positive, 5 negative at 0 , 90 , 180 , 270

Result: PASS

# 8.3.1 E.U.T. Operation

Operating Environment:

Temperature: 22.0 °C

Humidity:46 % RH

Atmospheric Pressure:1007 mbar

E.U.T. Operation: Test the EUT with full function according to standard.

Test Report Tel:400-688-3552 Web:www.dl-cert.com Email:service@dl-cert.com Page 83 of 91

### 8.4 Injected Currents 0.15MHz to 230MHz

Test Requirement: EN 15194:2017

Test Method: IEC 61000-4-6 :2006

Test Date: Nov. 12, 2023

Frequency Range: 0.15MHz to 230MHz

Test level: 3V rms on AC Ports (unmodulated emf into 150  $\Omega$ )

Modulation: 80%, 1kHz Amplitude Modulation

Result: PASS

### 8.4.1 E.U.T. Operation

Operating Environment:

Temperature: 22.0 °C

Humidity:46 % RH

Atmospheric Pressure:1017 mbar

E.U.T. Operation: Test the EUT with full function according to standard.

#### 8.4.2 Test Results:

Frequency	Line	Test Level	Modulation	Step Size	Dwell Time	Observation (Performanc e Criterion)
150kHz to 230MHz	AC Supply Cable	3Vrms	80%, 1kHz Amp. Mod.	1%	3S	No Loss of Function (A)

Test Report Tel:400-688-3552 Web:www.dl-cert.com Email:service@dl-cert.com Page 85 of 91

## 8.5 Voltage Dips and Interruptions

Test Requirement: EN 15194:2017

Test Method: IEC 61000-4-11 :2004

Test Date: Dec. 04, 2020

Test Level: 0% of U<sub>⊤</sub> (Supply Voltage) for 0.5 Periods

40% of U<sub>T</sub> (Supply Voltage) for 10 Periods

70 % of U<sub>T</sub> (Supply Voltage) for 25 Periods

Report No.: DLS-250604014R

No. of Dips / Interruptions: 6 per Level

Result:PASS

# 8.5.1 E.U.T. Operation

**Operating Environment:** 

Temperature: 22.0 °C

Humidity:46 % RH

Atmospheric Pressure:1017 mbar

E.U.T. Operation: Test the EUT with full function according to standard.

#### 8.5.2 Test Results:

EUT operating mode	Dropout % U₁Phase	Phase	Duration of dropout in Periods	No of dropout	Time between dropout	Observation s (Performanc
On mode	100	0	0.5	3	10s	(B)
On mode	100	180	0.5	3	10s	(B)
On mode	60	0	10	3	10s	(A)
On mode	60	180	10	3 0	10s	(A)
On mode	30	0	50	3 6	10s	(A)
On mode	30	180	50	3	10s	(A)

Test Report Tel:400-688-3552 Web:www.dl-cert.com Email:service@dl-cert.com Page 86 of 91

### 8.6 Absorber line Chamber

Test Requirement: EN 15194:2017
Test Method: ISO 11452-2:2004
Test Date: Nov. 17, 2023
Frequency Range: 20MHz to 2 GHz
Test level: 36V/m on enclosure

Modulation: 80%, 1kHz Amplitude Modulation Criteria: Refer to ISO 11452-2:2004

### 8.6.1 E.U.T. Operation

Operating Environment:

Temperature: 22.0 °C

Humidity:46 % RH

Atmospheric Pressure:1007 mbar

E.U.T. Operation: The EUT is in representative work mode.

# 8.6.2 Test Results: Pass

Test Report Tel:400-688-3552 Web:www.dl-cert.com Email:service@dl-cert.com Page 87 of 91

Report No.: DLS-250604014R

### 8.7 Radiated Immunity

Test Requirement:EN 15194:2017

Test Method:ISO 11451-1:2001 & ISO1145-2:2001

Test Date: Nov. 17, 2023

Frequency Range:20MHz to 2 GHz Test level:36V/m on enclosure

Modulation:80%, 1kHz Amplitude Modulation

Criteria: Refer to ISO 11451-1:2001 & ISO11452-2:2001

### 8.7.1 E.U.T. Operation

Operating Environment:

Temperature: 22.0 °C

Humidity:46 % RH

Atmospheric Pressure:1007 mbar

E.U.T. Operation: The EUT is in representative work mode.

### 8.7.2 Test Results: Pass
